

Senior Software Developer

Covariance Biosciences, LLC dba AgriPlex Genomics seeks to employ a Senior Software Developer at its Cleveland, Ohio facility. To apply, email your resume to apg-hr@agriplexgenomics.com.

Key Job Responsibilities:

- Design, develop, and optimize high-performance data processing applications. This includes writing clean, efficient, and scalable code, as well as improving existing software to enhance performance and functionality.
- Confer with the product and sales teams to tailor applications according to customer needs and deliver within agreed timelines. Coordinate the successful deployment and integration of applications into customer environments.
- Consult with customers to identify and resolve technical issues with software applications, updates, and optimization.
- Supervise and assign work to junior software developers.
