

Sample Processing Specialist

AgriPlex Genomics was formed in 2014 with the goal of creating a platform for genotyping in large populations. We specialize in focused, simultaneous analysis of DNA samples in support of animal and plant breeders. Our proprietary technology allows us to partner with breeders and researchers to identify desirable traits, leading to healthier and more productive crops and livestock. We are currently seeking a Sample Processing Specialist for this important work.

The ideal candidate will assist in the receiving, logging and storage and upfront processing of customer samples.

Key Responsibilities:

- Execute high volume, robotically driven, repetitive, plant and animal sample processing (training will be provided.)
- Maintain thorough and precise documentation.
- Contribute to necessary lab maintenance activities, such as: maintaining inventory, up-keeping lab hygiene, receiving and sending goods.
- Follow SOPs (Standard Operating Procedures) and established lab protocols and participate in the lab continuous improvement efforts.
- Learn new techniques as required.

Minimum Requirements:

- High-School graduate; students pursuing degree in biology, biotechnology or related field highly preferred.
- Prior laboratory work experience is an advantage.
- Ability to understand and follow work instructions and protocols.
- Flexible work schedule to meet the needs of the laboratory as needed.
- Ability to communicate clearly while maintaining exemplary laboratory notebooks.

Key Competencies:

- Attention to detail
- Strong organizational skills
- Excellent written and verbal communication skills
- Team oriented

LOCATION: University Circle, Cleveland, OH.
